

STUDENT CRUD APPLICATION

Minor Project Report

Submitted By

Student Name: Pranshu Tyagi

Course: B. Tech (CSE)

Semester: 6th

Department: Computer Science & Engineering (C.S.E)

College Name: Coer University

Submitted To: Saravana Kumar

Project Guide: ? Community to decide project.

Date of Submission:06/07/2026

Certificate

This is to certify that **Pranshu Tyagi** has successfully completed the Minor Project titled "**Student CRUD Application**" under the guidance of **Project Guide Community to decide project** during the internship session on 6june 2026.

1. Introduction

The Student CRUD Application is a web-based application developed using HTML, CSS, and JavaScript. It allows users to create, read, update, and delete student records through a simple user interface.

2. Abstract

This project demonstrates CRUD operations without using a backend database. Student records are managed using JavaScript and displayed dynamically on the webpage.

3. Objective

- Learn CRUD operations.
- Understand DOM manipulation.

- Improve JavaScript programming skills.
 - Build a responsive web application.
-

4. Problem Statement

Managing student records manually is time-consuming and error-prone. This application provides a simple digital solution for adding, updating, editing, and deleting student information.

5. Software Requirements

- Visual Studio Code
 - Google Chrome
 - HTML5
 - CSS3
 - JavaScript
 - Live Server Extension
-

6. Hardware Requirements

- Laptop/Desktop
 - Minimum 4 GB RAM
 - Intel i3 or above
 - Windows 10/11
-

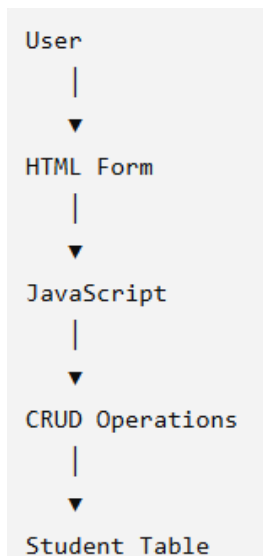

7. Technologies Used

Technology	Purpose
HTML	Structure
CSS	Styling
JavaScript	CRUD Logic
Local Storage	Store Data

Technology

Purpose

8. Project Architecture

9. Working of the Project

Step 1

Open the application.

Step 2

Enter student details.

Step 3

Click **Add Student**.

Step 4

Student data is displayed in the table.

Step 5

Click **Edit** to update details.

Step 6

Click **Delete** to remove the student record.

10. CRUD Operations

Create

Adds a new student.

Read

Displays all students.

Update

Modifies student information.

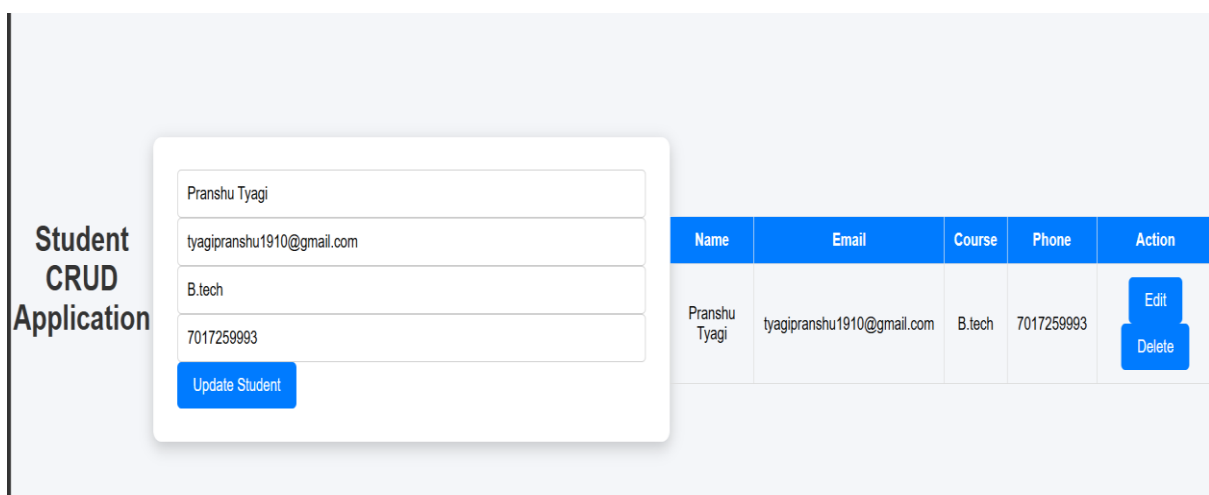

Delete

Removes student information.

11. Screenshots

(Add screenshots here)

- Home Page
- Add Student
- Student List
- Edit Student
- Delete Student

Student CRUD Application

Enter Name	Enter Email	Enter Course	Enter Phone Number	Add Student
---	--	---	---	--

Name	Email	Course	Phone	Action
Pranshu Tyagi	tyagipranshu1910@gmail.com	B.tech	7017259993	Edit Delete

12. Advantages

- Easy to use
 - Fast performance
 - Beginner-friendly
 - No database required
 - Responsive interface
-

13. Limitations

- No login system
 - No backend database
 - Data may be lost if Local Storage is cleared
-

14. Future Enhancements

- User Authentication
 - MySQL Database
 - Search Feature
 - Sorting
 - Pagination
 - Export to PDF/Excel
-

15. Testing

Test Case	Expected Result	Status
Add Student	Student added	Pass
Edit Student	Data updated	Pass
Delete Student	Student removed	Pass
Empty Fields	Validation message	Pass

16. Conclusion

The Student CRUD Application successfully demonstrates the implementation of Create, Read, Update, and Delete operations using HTML, CSS, and JavaScript. It is a simple, efficient, and educational project that helps students understand front-end web development concepts.
